

Acopian BirdSavers

Prevent birds
from flying
into windows.

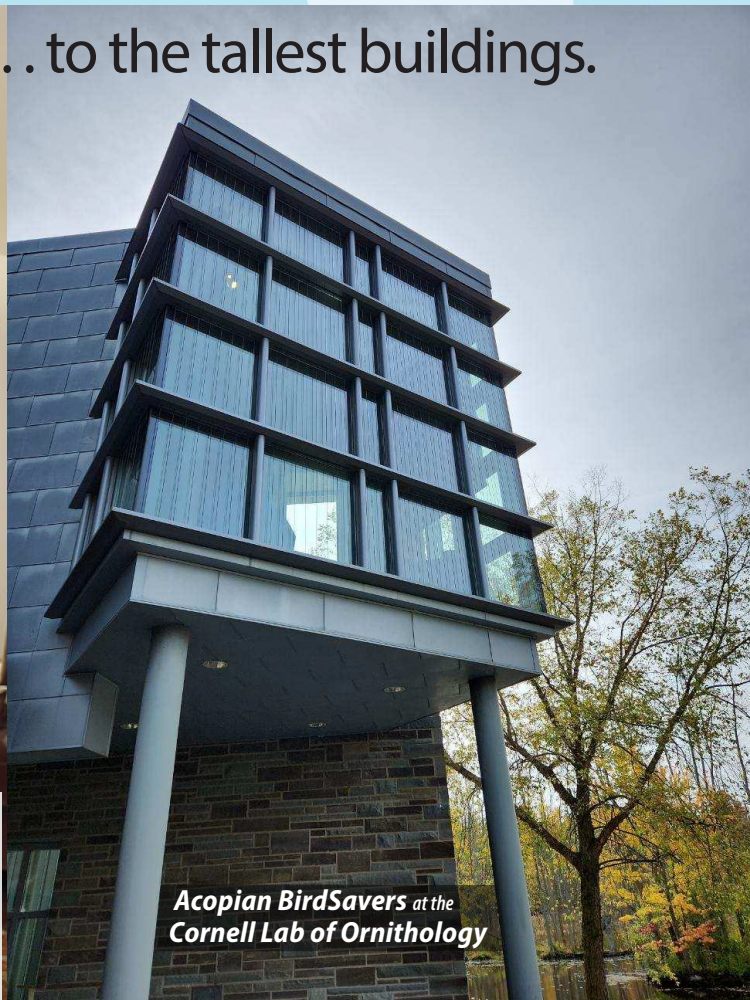

- Very elegant solution.
- Very simple design.
- It works!

From our everyday windows ... to the tallest buildings.

What are Acopian BirdSavers?

Simple, thin cords that hang outside your window. The leftmost window in the picture has Acopian BirdSavers installed. They look cool, don't block your view, gently sway in the wind, and will last practically forever.
